

## eCoupled Products Fact Sheet

About eCoupled enabled products:

- eCoupled items charge at a rate comparable to traditional (plugged) charging
- eCoupled technology is safe— no exposed cords or contacts between charging surface and product.
- eCoupled eliminates the need for corded chargers and adaptors and increases efficiency on the jobsite or at home.

### Center Console Pocket

Model: MCS-POCKET-eC

Materials: Steel with flame retardant ABS pocket and cup holder

Dimensions: 7" H x 9" W x 5" D

Manufactured: Stevens Point, Wis., by Gamber-Johnson, a Leggett & Platt company

Average Price: \$250 - \$300 (includes Energizer Hard Case Flashlight)

Built to be installed in the cabs of emergency and public safety vehicles. Wirelessly charges flashlights and cell phones even when the vehicle engine is off. Eliminates the need for corded phone chargers and replacement batteries.

### Computer Cradle

Model: NP-NOTEPAD-eC

Materials: Steel

Dimensions: 1.5" H x 15" W x 8" D

Manufactured: Stevens Point, Wis., by Gamber-Johnson, a Leggett & Platt company

Average Price: \$450 - \$500

Installed to the right of the driver as a computer cradle, it holds and powers laptop computers. Keeps computer charged even when the engine is off.

### Van Interior Shelving System

Model: QFIII

Materials: High density polyethylene

Dimensions: 4" H x 36" W x 19" D

Manufactured: Atlanta, Ga., Masterack, a Leggett & Platt company

Average Price: \$400 - \$500 (Includes Bosch tool case and eCoupled batteries)

Installed in the back of commercial work vehicles. Designed to be used with Bosch eCoupled power tools and laptop computers. Bosch tools are neatly organized in an eCoupled toolbox which locks onto the vehicle shelving, keeping them tidy, secure *and* fully powered.
